Colours are a guide only and not for colour accuracy

The RainReviva Pump Box system is designed to make your tank work more efficiently with the intelligence to identify the water level of your tank and automatically switch it to mains water and back again as necessary. This pump box has been designed with the sole purpose of making installation as easy and as simple as possible. Available in full range of colours.

### key features

- Quick installation
- All plumbing conducted from the outside of the pump box
- Motorised ball valve, no solenoid or diaphragm to clog up
- No priming required for switch back
- Pump box comes with air vents and drain holes
- 2 Year Warranty on RainSmart Control System
- Low voltage float and valve for safety
